Sr. No. of Event / Activity	Day/Date	Year	Month	Time	Venue	Description of Activity
1.	4	2020	October	5pm-6pm	Online	Open-source, Hacktoberfest Meet

Details of participation in the event/activity
(Fill wherever is applicable or information is available. At least total need to fill)

No of students / faculty	COMP	ETRX	EXTC	IT	MECH	Total no of participants
Day1						70
Day2						

Report of event/ activity

Event: Open Source, Hacktoberfest Meet

This short meet on Open Source was conducted during Hacktoberfest as a way to introduce new programmers to the world of open source. The challenge was to make open source contributions for newcomers as easy as possible but at the same time very interesting.

The team at KJSCE CodeCell developed http://comics.kjscecodecell.com , a website where participants can build their own comics. All they had to do to contribute their comic to the site was to add a JSON file with their name and the contents of the comic within it in JSON. The site will parse and generate the comic. We had tons of comics (which are still hosted) and the participants learned the concepts of version control along with open source collaboration in a fun and intuitive manner.

We then talked about Hacktoberfest, which is a global celebration of open-source software in which everyone can participate and earn goodies and learn more about OSS (Open source software). Participants were informed that many companies participate in Hacktoberfest and give out goodies to contributors who help their product in any of the ways: finding bugs and fixing errors, adding new features/enhancements, etc.

We then showed the process of submitting pull requests to online repositories supported for Hacktoberfest so that those pull requests are counted towards their overall contribution to Hacktoberfest.
